Selected papers from the

XX Congress of the European Association of Cranio-Maxillo-Facial Surgery

Bruges (Belgium), September 14-17, 2010

Editor
Maurice Y. Mommaerts MD, DMD, PhD
Foreword

This book contains 76 papers written by authors, who had presented their research at the XXth Congress of the European Association of Cranio-Maxillo-Facial Surgery, which took place on September 14-18 in captivating Bruges, in the Kingdom of Belgium. It is not to be considered as an official Conference Book and the publications have not been peer-reviewed. The official abstracts of the Congress have also been published by Medimond, in a special digital issue published on [www.eacmfs2010.org](http://www.eacmfs2010.org) and [www.eurofaces.com](http://www.eurofaces.com).

The Bruges meeting included over 1,400 scientific participants, and was the venue for 1,250 invited talks, oral presentations, e-posters, and satellite symposia. Medimond’s policy is to provide rapid publication of conference reports. I, therefore, agreed with this publisher’s request that we would only correct major mistakes or errors in scientific logic and fact. We would neither concern ourselves with stylistic differences in expression by authors whose first language is other than English, nor with differences in font type, style, or referencing in these chapters. Each author is solely responsible for the information provided in his/her chapter. The manuscripts have, nevertheless, received our general overview, with minor editorial changes inserted where necessary, in the interest of maintaining scientific integrity, while at the same time enabling the rapid publication of these findings. We trust that this book (and the accompanying CD) will provide the reader with a broader overview of the scope and richness of the programme of the XXth EACMFS Congress.

Maurice Y. Mommaerts, MD, DMD, PhD

**Ear reconstruction**

The research of “quality of life” of patients with total defects of an auricle after a surgical treatment.

Chkadua T., Brusova L., Lashchinina J. ................................................................. 39

**Imaging, simulation and navigation**

Automated Three-Dimensional Cephalometric Landmark Identification
Keustermans J., Swennen G., Mollemans W., Schutyser F., Vandermeulen D. and Suetens, P. ................................................................. 45

Automated segmentation of teeth from CBCT images
Keustermans J., Mollemans W., Schutyser F., Vandermeulen D. and Suetens P. .............. 49

**Medical Oncology**

Expression of Hypoxia-Inducible Factor-1 Alpha in Oral Squamous Cell Carcinoma
Noguchi Natsuyo, Kawashiri Shuichi, Kato Koroku, Yoshizawa Kunio, Kitahara Hiroko, Yamamoto Etsuhide ................................................................. 53

The role of tumor markers and another clinico-laboratories results in prognosis of relapse oral squamous cell carcinoma.
Yaremenko A.I., Manikhas G.M., Kutukova S.I., Bozhor S.S .............................................. 59

Differentiation Between Benign And Malign Transformed Precancerous Lesions Of The Oral Mucosa With Mage-A-Antigens

Clinical Significance of Cortactin and Cyclin D1 Expression in Squamous Cell Carcinomas of the Tongue
Nakamori K., Dehari H., Imai T., Miyazaki A., Ogi K., Anbo N., Shimanishi M. and Hiratsuka H. ................................................................. 69

Oral tuberculosis mimicking squamous cell carcinoma
Streian F, Ianese E, Vasile L, Talpoș S, Nicoară A, Pricop M .................................................... 75

Pain is a prognostic factor in association with cancer growth pattern and clinical stage in patients with oral squamous cell carcinoma
Sato J, DDS, PhD, Yamazaki Y, DDS, PhD, Satoh A, DDS, PhD, Notani K, DDS, PhD, Kitagawa Y, DDS, PhD ................................................................. 81
**Orthognathic surgery**

Mandibular Internal Curvilinear Distraction – Long Term Follow-Up  

Is short distraction osteogenesis of the mandible on adults recommendable?  
Bschorer R., Siegmund B., Goppold K. 95

Cone Beam CT assessment of nasal septal deviation changes following surgical rapid maxillary expansion.  

Use Of Ultrasonic Bonescalpel In Orthognatic Surgery  
Dammous S, MD, DDS, Darche V, MD, DDS, Gilles R, MD, DDS 113

Chin Management in Severe Class II Division 2 Patients  
Grybauskas Š, Razukevicius D, Deryabin G 121

Custom TMJ Prosthesis and Bimaxillary Orthognathic Surgery Case Report  
Hirjak D., MachoňV., Beňo M., Janec J. 129

Chin augmentation with inkjet-printed custom-made tricalcium phosphate implant  

Orthognathic Surgery Conducted By Piezoelectric Saw  
Jagielak M., Michalski P., Jagielak A., Socha M., Roguš P. 141

Le Fort I Down Facture Predictable And Controllable Procedure  

Diagnostic accuracy of planar skeletal scintigraphy in mandibular asymmetry using a new reference  
Lo J, Yau YY, Cheung LK 153

Modifications of nasal width in maxillary advancements after le fort i osteotomy
