CORONARY ARTERY DISEASE 2013
Proceedings of the 10th International Congress on Coronary Artery Disease

Florence (Italy), October 13-16, 2013

Editors

Basil S. Lewis, MD, FRCP, FACC, FESC
Louis Edelstein Professor of Medicine and Medical Research
Ruth and Bruce Rappaport School of Medicine
Technion-Israel Institute of Technology
Director, Cardiovascular Clinical Research Institute
Lady Davis Carmel Medical Center, Haifa, Israel

Jeffrey S. Borer, MD, FACC
Professor of Medicine, Cell Biology, Radiology and Surgery
Chief, Division of Cardiovascular Medicine
Director, The Howard Gilman Institute for Heart Valve Diseases and the Schiavone Cardiovascular Translational Research Institute
Former Chairman, Department of Medicine, State University of New York Downstate Medical Center, New York, NY, USA

Moshe Y. Flugelman, MD
Associate Professor of Medicine
Ruth and Bruce Rappaport School of Medicine
Technion-Israel Institute of Technology
Director, Department of Cardiovascular Medicine
Lady Davis Carmel Medical Center, Haifa, Israel

David A. Halon, MB, ChB, FACC, FESC
Clinical Associate Professor of Medicine
Ruth and Bruce Rappaport School of Medicine
Technion-Israel Institute of Technology
Director, Interventional Cardiology
Lady Davis Carmel Medical Center, Haifa, Israel
Foreword

ICCAD 2013 provides an update on the new biology and research, new prevention, new diagnostic methods, and the new medical, interventional and surgical therapies for coronary artery disease. In a world of integrative patient management, also included are papers relating to the care of associated conditions such as valve disease, peripheral arterial disease, hypertension and diabetes.

This volume includes a selection of papers presented at ICCAD 2013 – the 10th International Congress on Coronary Artery Disease, held in the beautiful city of Florence, Italy. We thank the prestigious faculty, speakers and participants from around the world who brought their data to Florence, and who prepared these chapters for publication. Thanks also to the pharmaceutical and device industry for their generous support, to Kenes International Congress Organizers, and to our colleagues, friends and families for their never-ending help, support and advice in planning the meeting.

We hope and trust that the discussions, debates and updates in Florence will guide us in planning our research and patient management in the coming years.

Basil S. Lewis
Jeffrey S. Borer
Moshe Y. Flugelman
David A. Halon

Florence, Italy, October 2013
Index

Biology of Aging and Heart Failure Therapy: What’s new and What’s Missing
Jugdutt B.I. .......................................................................................................................................................... 1

Role of Adenosine Receptor Subtypes In Coronary Reactive Hyperemia
Zhou X., Mustafa Jamal S. ................................................................................................................................ 5

Intrauterine growth restriction adversely impacts on the complement of cardiomyocytes at birth and life-long functional reserve
Black M.J., Gezmish O., Lim K., Wlodek M.E. .................................................................................................. 11

Obesity modulates the transcriptional alterations of the natriuretic peptide and endothelin systems
Cabiati M., Belcastro E., Caselli C., Prescimone T., Guzzardi M., Iozzo P., Giannessi D., Del Ry S. ...... 17

CNP transcriptomic profiling in HF patients as a function of clinical severity
Cabiati M., Sabatino L., Caruso R., Verde A., Caselli C., Prescimone T., Giannessi D., Del Ry S. ...... 21

Transcriptional alterations of ET-1 system in lung tissue of obese Zucker rat
Cabiati M., Salvadori C., Caselli C., Prescimone T., Bartoli A., Guiducci L., Giannessi D., Del Ry S. ... 25

Left Ventricular Assist Device Activates the Transcriptional Apoptotic Profile in Human Heart
Prescimone T., Masotti S., D’Amico A., Caruso R., Cabiati M., Caselli C., Viglione F., Verde A.,
Del Ry S., Giannessi D. .................................................................................................................................... 29

Roles of HtrA1 in non-hypertensive arteriosclerosis
Ikawati M., Hadi A.P., Kawaichi M., Oka C. .................................................................................................... 33

Treatment of peripheral arterial disease with stem cells
Brehm M. ............................................................................................................................................................ 37

in situ reprogrammed spermine treated-adipose tissue-derived multi-lineage progenitor cells improve left ventricular dysfunction in a swine chronic myocardial infarction model
Okura H., Soeda M., Miyagawa S., Sawa Y., Ichinose A., Matsuyama A. ......................................................... 39

Transplantation of Human Adipose Tissue-Derived Multi-Lineage Progenitor Cells but not Adipose Tissue-Derived Stromal/Stem Cells Reduces Serum Cholesterol in Hyperlipidemic Watanabe Rabbits
Okura H., Soeda M., Morita M., Ichinose A., Matsuyama A. ........................................................................ 43

Angiogenesis and Capillary Network Development in Porous Silk Fibroin Film
Bai L., Hu Q., Zhan K., Xu J. ............................................................................................................................ 47

Transplantation of Adipose Tissue-Derived Multi-Lineage Progenitor Cells Reduces Serum Cholesterol in Hyperlipidemic Watanabe Rabbits
Okura H., Soeda M., Morita M., Ichinose A., Matsuyama A. ........................................................................ 51
The role of experimental model of atherosclerosis: apoE-knockout mice in developing new drugs against atherosclerosis
Jawien J. ................................................................................................................................. 55

The Added to St Thomas Hospital Cardioplegic Solution of Propofol is Effect on Ischemia and Reperfusion Injury at Isolated Normal and Hypercholesterolemic Rabbit Hearts
Algın I.H., Silistreli E., Akgün A., Kalkan S., Tuncok Y. ............................................................. 57

TAKOTSUBO Cardiomyopathy, what is it? Polish viewpoint
Nowak R., Fijalkowski M., Targonski R., Dubaniewicz W., Fijalkowska M., Rynkiewicz A. .......... 63

The taking care process for cholesterol management: An ethnographic study
Fournier T., Bruckert E., Alamowitch C., Naelten G., Boireau N. .................................................. 67

Measurement of High-Molecular-Weight Adiponectin is not Useful in Assessing Coronary Stenosis in Japanese Male
Imatoh T., Miyazaki M., Kadowaki K., Tanihara S., Une H. ......................................................... 71

Epidemiology of Abdominal Aortic Aneurysms and Cardiovascular Associations in Qatar
Al-Thani H., El-Menyar A. ........................................................................................................... 75

The Survival of Patients with Degenerative Aortic Stenosis Correlated with Posterior Mitral Annular Calcification and Intima - Media Thickness. A Prospective Study
Mercea D., Pop C., Leucuta D., Lucian B., Pop D., Zdrenghea D. .................................................. 79

Cellular Adhesion Molecules: Early Indicators of Subclinical and Clinical Cardiovascular Disease Risk in a Young Adult Population

Use of Ambulatory Blood Pressure Monitor (ABPM) for guiding cardiac patient management
Charuzi Y., Gao R., Mirocha J. ....................................................................................................... 87

Computed Tomography Coronary Angiography for Assessment of Coronary Artery Disease and Patient Prognosis in Type 2 Diabetics
Halon D.A., Rubinshtein R., Lewis B.S. ........................................................................................... 93

The Role of Echocardiography in Diagnosis and Follow Up of Patients with Takotsubo Cardiomyopathy or Acute Ballooning Syndrome

The Role of Dobutamine Stress Echocardiography in Detecting Coronary Artery Disease Compared with Coronary Angiography
Naser N., Buksa M., Kusljugic Z., Mulabegovic N., Spuzic M., Hondo Z., Sokolovic S., Brdzanovic S., Mekic M., Hodzic E., Terzic I. .................................................................................. 103

Sensitive and Multiplexed MRM-based Quantitation of Candidate Disease-related Protein Biomarkers in Human Plasma
Diagnostic Accuracy of Magnetic Resonance Myocardial Perfusion Imaging for diagnosis of functionally significant obstructive coronary artery disease. A systematic review  
Pharithi R.B., Newell M., Meela M., Conway M., Kropmans T. ................................................................. 115

Computed Tomography and Scintigraphy vs. Cardiac Catheterization for Coronary Disease Screening Prior to Noncardiac Surgery
